**Attention:** Mr. Karl Falkenberg

Director-General

DG Environment

*Dear Mr. Falkenberg*

**SAVE CORAL BEACH IN BULGARIA**

I would like to present myself: I am Atanas Rusev, an authorized official representative of **SAVE CORAL BEACH** *civil association*. I am addressing to your administration an ***appeal for support and monitoring***.

Undoubtedly, the ***European Commission*** already keeps a close watch on the information about the dubious number of ***illegal construction permits*** issued for the land of former camping **Coral** on the **Bulgarian seacoast**. Indeed, Coral is the ***last place*** on our ruined seacoast, still untouched by the immature investor's hand and the irresponsible local administration.

The **monstrous Project** whose future construction the authorities are ***trying to legalize*** is outrageous: 2500 apartments and 1800 underground parking places on the previously ,arranged' as ***no longer protected area***. Still, a large population of the ***extremely valuable*** spring marsh snowdrop grows there!

As we all know, we have borrowed the land of our children and I must bring your attention to the ***irregularity of the permits***, the ***missing infrastructure***, and, above all, the disgraceful lack of ***environmental effect assessment*** official report.

The importance of the matter especially in the last days of new political situation in Bulgaria demands your support and monitoring, which would be an immeasurable help to the process of ***saving of the last piece on the Bulgarian seacoast as protected area***.

Please, feel free to contact me for any further information, documentation, and unique photographic material.

I shall be grateful for a quick reply.

Sincerely,

---

Atanas Rusev
